Mathematics
Year 7 Maths

Y E A R   7

T E R M   1
Number theory, Directed Number, Fractions

T E R M   2
Decimals, Percentages, Algebra and Cartesian Plane

T E R M   3
Linear Equations, Geometry of angles and shapes

T E R M   4
Statistics and Probability, Transformations

In Year 7 students will be engaged in a variety of learning tools as they move through the program of learning indicated above which aligns to the Australian Curriculum. These include written materials, online learning software and hands-on tasks to build fluency with skills and develop an understanding of the concepts.

Students will demonstrate their learning through both in-class investigations and topic tests.

Some of the investigations include Number Modelling activities, the connection between Patterns and Algebraic expressions and exploring the applications of Measurement through an Interdisciplinary unit combining Maths and Science.
