# Science/ Technology **Science**

## **YEAR 7**

### **TERM 1**

Introduction to Science and Chemistry

### **TERM 2**

Physics

### **TERM 3**

Biology

### **TERM 4**

Earth and Space

## INFORMATION

In Terms 1 and 2, Year 7 students' study what a scientist does, how they work, and the basic equipment they use. They will explore different forces and model and the consequences of change within them. They will become familiar with and use the scientific method to investigate questions that they have identified.

In Terms 3 and 4 students will look at the interactions between systems within our universe that create predictable and unpredictable phenomena. They will also look at the relationships between organisms in an environment and the flow of energy between them.
